EB tresos Portfolio

To meet dedicated OEM platform needs and individual Tier1 life cycles the EB tresos Solution combines EB Products and Standardized Services for ECU projects.

License Types for Target Software - Overview

License Type	Definition
Concept	<i>License valid for acquiring customers or to proof technical concepts. Valid for 12 month.</i>
Project	<i>License valid for one mass production project of one Tier1 product of one Vehicle OEM brand and to one Vehicle Model Generation.</i>
Product Line	<i>License valid for production projects restricted to one Tier1 product.</i>
OEM restricted Product Line	Product Line restricted to one OEM brand
BU License	<i>License valid for multiple mass production projects of the business unit of the purchasing company acting as Tier1 without any Vehicle OEM restrictions.</i>
Company License for Tier1	<i>License valid for use at one Tier1 for multiple projects.</i>
OEM restricted Company License for Tier1	Company License restricted to one OEM brand
ECU Cross Platform License for OEM	<i>License valid for multiple mass production projects of one OEM ECU product.</i>

License Types for Target Software – Detailed Validity Matrix

Type	Duration	Mass production	HW target & compiler	Product	OEM	Tier1	ECU SW Version
Concept	1 year	No	1	1	All	1	1
Project	Unlimited	Yes	1	1	1	1	1
OEM restricted Product Line License	Unlimited	Yes	1	1	1	1	All
Product Line	Unlimited	Yes	Family (derivatives tbd)	1	All	1	All
OEM restricted Company for Tier1	Unlimited	Yes	Family (derivatives tbd)	All	1	1	All
BU License for Tier1	Unlimited	Yes	Family (derivatives tbd)	All	All	Business Unit	All
Company for Tier1	Unlimited	Yes	Family (derivatives tbd)	All	All	1	All
ECU Cross Platform License for OEM	Unlimited	Yes	Family (derivatives tbd)	1	1	n.a.	All

Term

Definition

HW target One dedicated uC hardware derivate platform.

Product One Tier1 product

ECU SW
Version One ECU software binary

Examples

Infineon TC39XX, NXP S32K14X, Renesas RH850F1K

Park Assistant, Airbag, Climate Control Unit, Lane Departure Warning, Wind shield wipers

Variations of control functionalities for different car platforms are implemented by calibration parameters, pre-compile or pre-build software configuration, only.

License upgrade, change and extension for Target Software

Action	Definition	Costs with maintenance	Costs without maintenance
License Type Upgrade	Extend existing license from one product license type to another, the product version stays unchanged. <i>Example:</i> Extend existing project license to a product line license. Note: License type upgrades do not extend the existing maintenance contract. Restriction for Concept: If concept license has been extended by another 12 months, only the valid concept license can be used for upgrade.	List price difference	List price difference
License Version Extension	Extend the existing license for one product version with another version. Both version can then be used. <i>Example:</i> Extend license for version ACG7 to ACG7 & ACG8 Remark: Not available for all license types (requires product-line license or higher license type)	30% discount on list price of the new version (functional changes between versions e.g. ACG8->ACG9) 70% discount (small functional changes between versions e.g. ACG7->ACG8)	0% discount on list price of the new version (functional changes between versions e.g. ACG8->ACG9) 40% discount (small functional changes between versions e.g. ACG7->ACG8)
